GROW KIT LINEUP — SITE COPY

MUSHROOM ZEN ACADEMY | Owner-review draft | November 2026

Shop Gourmet Mushroom Grow Kits

Grow gourmet mushrooms at home with Mushroom Zen Academy. Our planned 4-lb prepared grow kits contain spawn already mixed with substrate—no customer inoculation required. Every variety includes its own care instructions after our cultivation and shipping trials are complete.

Planned individual kit price: $34.95 plus shipping. Planned two-kit offer: $64.95 plus shipping. Final pricing and availability require owner approval.

Initial prototype varieties

Lion's Mane — delicate, cascading white growth with a distinctive texture.

Blue Oyster — clustered oyster mushrooms that are rewarding to observe as they develop.

Additional spawn ordered

Pioppino — clustered mushrooms with distinctive darker caps.

King Oyster — a gourmet variety known for its thick, substantial stems.

Pink Oyster — colorful clustered oyster mushrooms that prefer a different growing environment from Blue Oyster.

Other varieties in evaluation

Shiitake, Maitake, Italian Oyster, Trumpet (species to be confirmed), and Princess Pearl / Pearl Oyster are in agar evaluation. These are not confirmed launch-ready kits.

Internal release checklist

For each species: verify clean spawn, colonization, fruiting method, repeatable harvest, packaging dimensions, shipping stability, photography using only Mushroom Zen's own images, and accurate species-specific customer instructions.

Do not enable purchasing or claim any species is available until its actual production stock and quality checks are confirmed.

Educational guide for legal gourmet mushroom cultivation. Species-specific conditions and the final kit format must be validated in Mushroom Zen Academy trials before customer release.
